

Test – Lesson 1 – Intro to Anatomy & Physiology

1. There is logic to understanding what is wrong with a patient.

- (A) true
- (B) false

2. The chief complaint is what generally brings a patient to a doctor. A common name for the chief complaint is \_\_\_\_\_.

- (A) exhibiting system
- (B) presenting system
- (C) manifesting symptom
- (D) alleging system

3. Write the letter of the matching systems to the descriptions below:

\_\_\_\_\_ This system includes the brain, spinal cord, motor and sensory nerves, and muscles.

\_\_\_\_\_ This system consists of six major glands in the body that release hormones into the bloodstream.

\_\_\_\_\_ This system begins in the mouth and extends down the esophagus into the stomach, small intestines, and ends up in the large intestines, also known as the colon.

\_\_\_\_\_ This system protects us from infectious agents, traumatic insults, radiation from the sun, and excessive heat and cold.

\_\_\_\_\_ This system includes the kidneys, the ureters carrying urine from the kidneys to the bladder, the bladder itself, and the urethra discharging urine.

\_\_\_\_\_ This system includes the larynx (or voice box), the trachea, bronchial tubes, lungs, and the coverings of the lungs called the pleurae.

\_\_\_\_\_ This system is the reproductive system, and includes the ovaries, uterus, and vagina in women and the testes, prostate gland, and penis in men.

- A. gastrointestinal
- B. urological
- C. nervous
- D. skin
- E. respiratory
- F. endocrine
- G. genital
